

Prestashop module installation manual

You will need API keys for your module to connect to Decta. API keys are available in [Decta's administration panel](#) - you will need to register a free account to get keys you can test your integration with. After that you can proceed with the rest of this manual.

To start accepting real-money payments, you will need to apply for a verified account.

Steps for upload Prestashop v1.7. module:

Step 1.

Go to the Prestashop administration panel - Module manager folder. After this click on the “Upload a module” button and drop the Decta module archive.

Step 3.

You will be redirected to the Decta module.

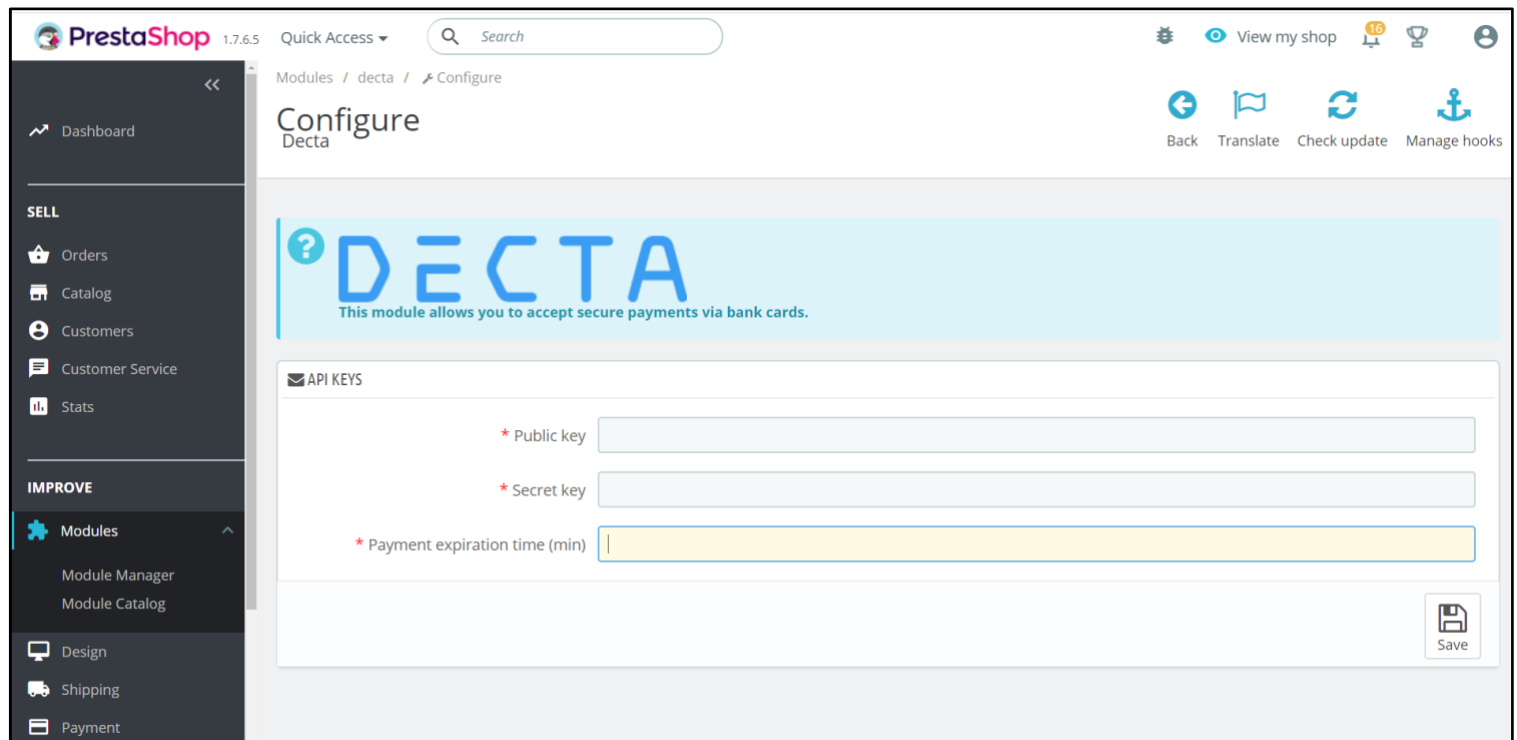

Image 4. Decta module

The module provides several parameters that should be filled out for it to work correctly:

- **Secret key** - available in Decta administration panel, API section;
- **Public key** - available in Decta administration panel, API section.

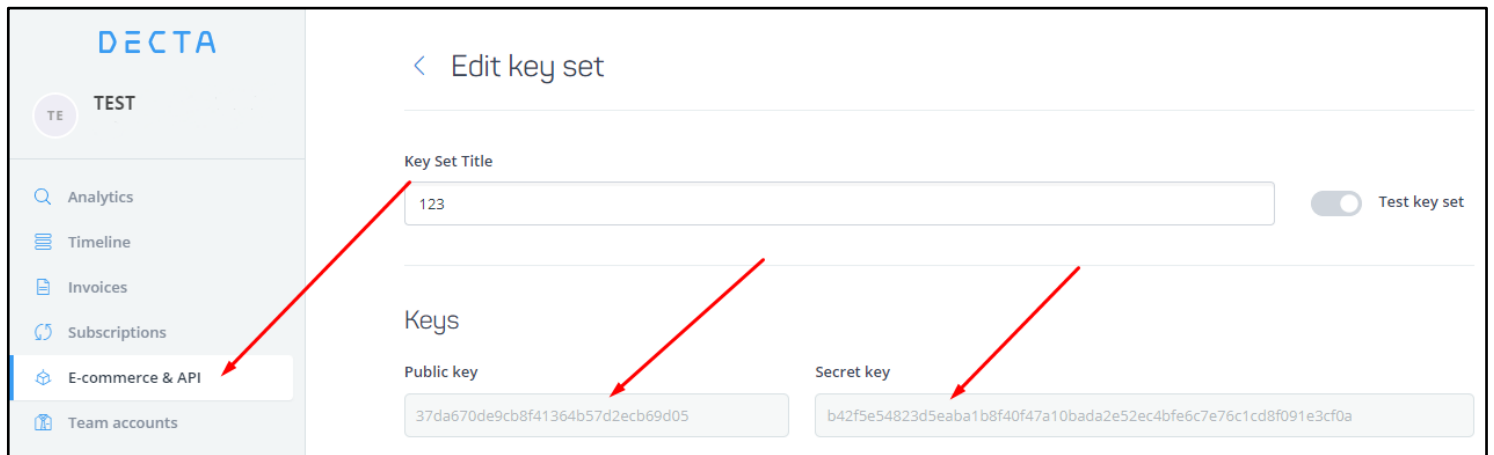

Image 5. Public key, Secret key

You can also set the validity period of the invoice by specifying the time in the field “Payment expiration time” (minimum time value is 5 minutes).

For this function to work correctly, you will also need to switch on the button “Strict overdue” (should be blue) which is available in Decta administration panel, Settings - Brands - Edit brand page.

And fill in the necessary information about:

- Group restrictions;
- Country restrictions;
- Currency restrictions;
- Carrier restrictions.

Save the result - this completes the setup process.
